On the therapeutic efficacy of electric acupuncture with moxibustion in 95 cases of chronic pelvic infectious disease (PID).

[Wang XM.](#)

Abstract

This article presents the joint use of electric acupuncture and moxibustion in the treatment of 95 cases of chronic PID. Clinical cure in 42 cases, marked improvement in 22 cases, some improvement in 17 cases, and no effect in 12 cases. the overall effective rate was 88.4%, which was superior to that of the control group (P less than 0.05) using antibiotics.
